

Toyota Boshoku exhibit at the Auto Shanghai 2021

Shanghai (CHINA) – Toyota Boshoku Corporation will present a booth in the 19th International Automobile Industry Exhibition (Auto Shanghai 2021) held from April 19 to 28. This year marks Toyota Boshoku’s sixth showing at the exhibition.

The Toyota Boshoku booth exhibits with the concept of “Healthy cabin to contribute to a secure lifestyle.” Showcased are the two car interiors developed with future autonomous driving in mind as well as products and technologies developed from viewpoints safety, the environment, and comfort.

1. Main Exhibits

1) Autonomous driving concept MOOX*

The MOOX concept features an interior space designed for MaaS (Mobility as a Service) that can be used in a variety of service sectors including business and entertainment.

2) Door trim equipped with HiPhi X which is currently being on sale in China

3) Toyota Boshoku’s original cabin air filters MIRO

4) Air filter equipped on the new model MIRAI fuel cell car

The air filter featuring highly efficient particle removal enables negative emissions.

5) Virus infection control partition

2. Booth location

Booth 7A10, Hall 7.1 in National Exhibition and Convention Center Shanghai
