

Toyota Boshoku Seats and Interior Components Used in New Lexus LC

A luxurious interior space created with advanced manufacturing technology

KARIYA (Japan) -March 21, 2017- Toyota Boshoku Corporation (TOKYO: 3116) has crafted seats and interior components with cutting-edge designs and functionality for the new Lexus LC Luxury Coupe that went on sale this month. As a supplier of interior systems, we have created a luxurious interior space boasting tactile properties and feel that are a perfect match for this symbol of Lexus's next generation of vehicles.

The main components we are providing for the new LC are as follows:

Seats:Leading-edge design and superb comfort made possible by our Foam In Place Method

Seats made with our Foam In Place Method deliver a superior sense of fit and support. First appearing in the May 2013 Lexus IS F-Sport, the seats have since been used in a number of Lexus models, including as sports seats in the new LC*¹. Our genuine leather seats*² are constructed with a single piece from the main part of the seat back to the shoulders, and has a layered construction that envelops the occupant's back. The sense of fit and advanced design are a perfect match for a coupe that is the symbol of Lexus's next generation of models. In addition to our total commitment to ride comfort, we pay minute attention to the form and stitch lines to produce seats with beautiful, flowing curves.

Sports seats

*1: installed in LC500h, LC500h“S Package”,LC500 and LC500“S Package”

Genuine leather seats

*2: Installed in LC500h“L Package”and LC500“L Package”

Door trim: Beautiful drape-like pleating enhanced by illumination

The design features unprecedented 3D drape-like pleating. Line illumination mounted on the upper side of the pleats casts shadows that cause them to stand out even more, making the beautiful design even more striking.

Toyota Boshoku will continue to be a company that persists in proposing excellent mobility for customers throughout the world, and work to offer QUALITY OF TIME AND SPACE in all aspects of human mobility.
