

Establishment of ESG KPIs and disclosure of results for FY 2022

In December 2021, Toyota Boshoku Corporation established ESG KPIs, non-financial KPIs that measure social value, in addition to financial KPIs that measure economic value established in the 2025 Medium-Term Business Plan. These ESG KPIs are followed up at the CSV Promotion Meeting, (chaired by Corporate Planning & Innovation Segment Chief) which is held twice a year.

The following is a summary of our results for fiscal 2022 (April 1, 2021 to March 31, 2022).

Please click [here](#) for details.

Going forward, we will continue to solve social issues through our core business and meet to the expectations of our stakeholders.
