*Press Day: October 29-30, Official Day: October 31,

Special Invitation Day/ Preview Day: October 31, General Public Days: October 31-November 9

1. Main Exhibits

1) An Integrated aircraft seat and in-cabin wheelchair solution "WellVoyage Seat"

Joint research and development are underway with JAXA to realize “Universal design for air travel,” aiming to make air travel more comfortable and accessible for all.

WellVoyage Seat is an integrated aircraft seat and in-cabin wheelchair currently under development to reduce the physical burden of transferring to a seat onboard.

By transferring to the WellVoyage Seat before boarding, passengers can move through the cabin just like with a conventional in-cabin wheelchair and then use the same unit as their seat during the flight.

This reduces the number of transfers required, easing the burden on both wheelchair users and their caregivers, and enabling smoother, more comfortable mobility throughout the journey.

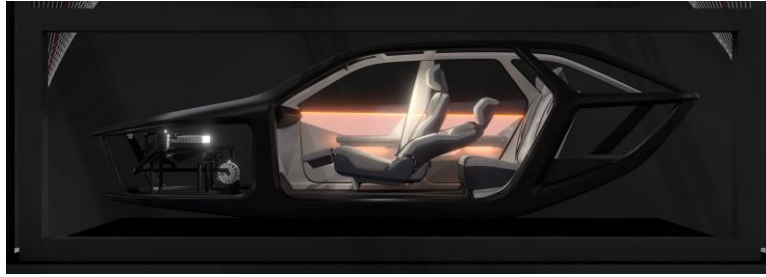

<Features>

- Each seat can be individually removed from the seat frame.
- This unit is equipped with swivel casters that rotate 360 degrees, enabling smooth movement in all directions—forward, backward, and sideways.
- The seat can be secured in a window-side position with the passenger seated, allowing them to enjoy the view outside.

2) Next-Generation Mobility Space Mock-up “I.C.30 -Integrated Cabin 2030-”

Toyota Boshoku presents its latest development aimed at realizing a comfortable mobility space built on the pillars of safety and environmental sustainability. The concept is showcased through a vehicle-shaped mock-up and a transparent display.

Discover Toyota Boshoku's expanding expertise through innovations such as the **“Relaxation & safety Seat,”** designed to ensure comfort and peace of mind in a variety of seating postures; **interior lighting** that creates a soothing atmosphere by adapting to the user's mood through dynamic lighting effects; and **Interior space control system** that harmonizes various in-vehicle devices to enhance the overall mobility experience.

3) Others

- "Proximity" an immersive experience seat utilizing the Ministry of Land, Infrastructure, Transport and Tourism's 3D city models.
- Costume made using automotive interior materials, including seat cover fabric and silver ant heat-insulation material.

2. Booth location Booth No. W3403, WEST3/4 hall, Tokyo Big Sight

3. Press briefing

- 1)Date and time/Location: October 30, 2025 from 11:30 to 11:40 Toyota Boshoku booth
- 2)Presenter: Masayoshi Shirayanagi, President

Details about this exhibit will be available on a special website at any time.
