

# 燃料电池车用空气滤芯

## Air Cleaner for Fuel Cell Vehicle

### 产品概要 / Product Summary

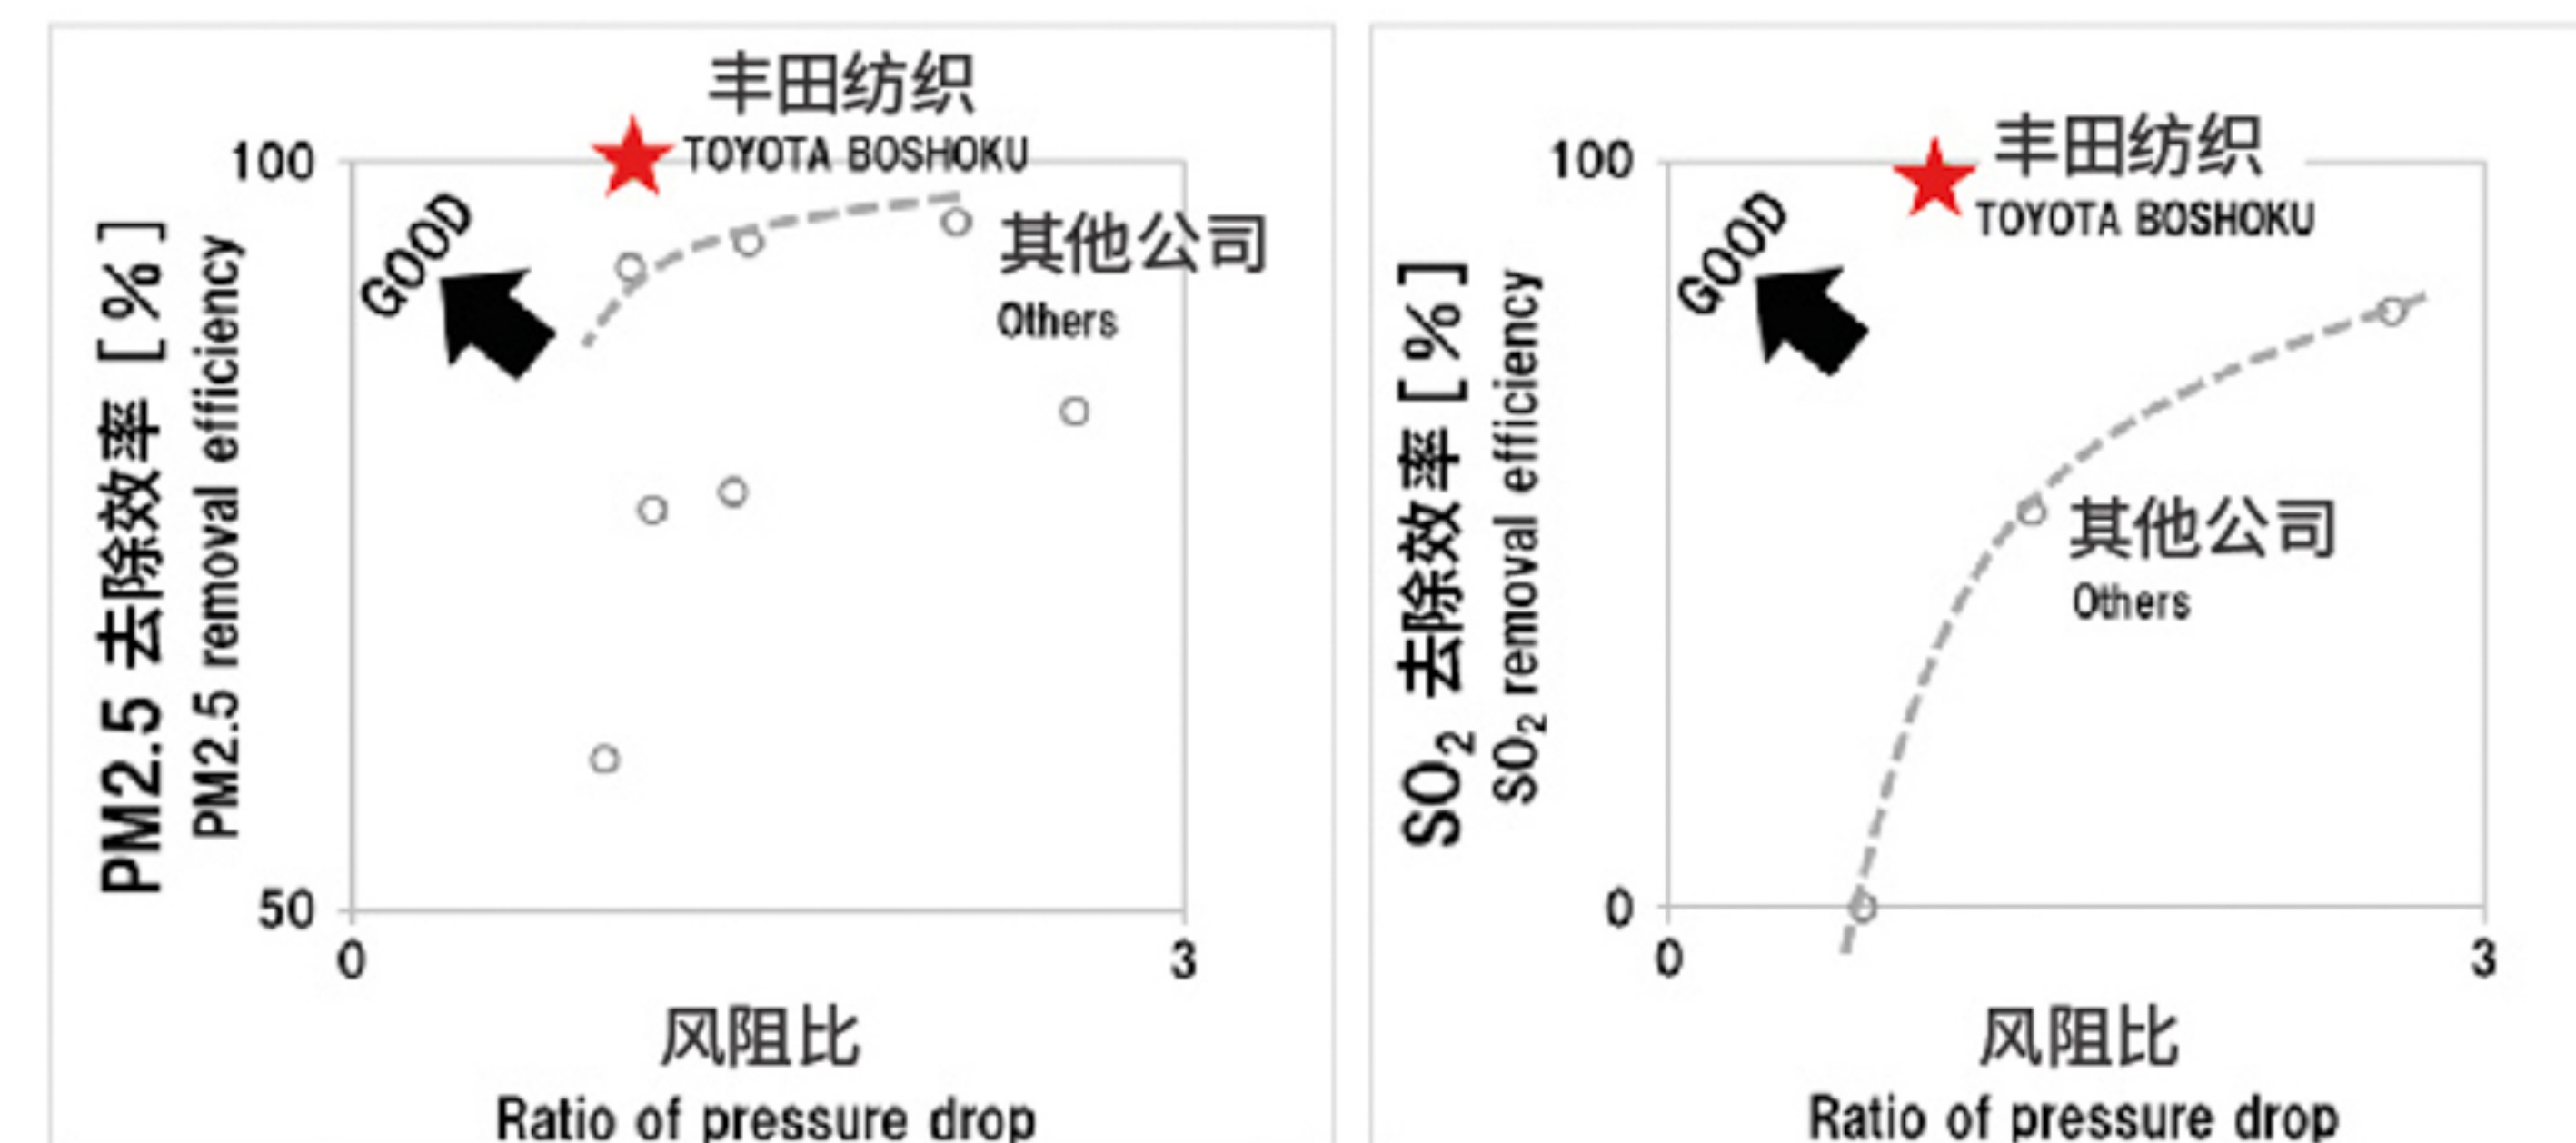

- 增加驻极功能，可高效去除 PM2.5。
- 用特有的混合吸附剂、高效去除形成 PM2.5 的3种主要物质。(SO<sub>2</sub>、NO<sub>2</sub>、NH<sub>3</sub>)
- Electrostatic charging to a conventional particula of PM2.5 filtration.
- An originally adsorbent-coated filter provides highly efficient removal of SO<sub>2</sub>, NO<sub>2</sub> and NH<sub>3</sub>, the three main precursor gasses responsible in generating PM2.5 pollution.

### 特征 / Features

全球顶级水平高效去除 PM2.5

The world's highest-level efficiency of PM2.5 filtration.

### 效果 / Results

为实现负排放做贡献 (汽车行驶得越多, 空气越洁净)

Contribute to the "Minus Emissions": The more you drive the cleaner the air is.
